5) ☐ Notice of Informal Patent Application (PTO-152)
6) ☐ Other: _____.

1. The IDS has been considered.
2. The disclosure is objected to because of the following informalities: the missing serial number on page 1 must be supplied.

Appropriate correction is required.

3. Claims 2,3,5 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

The oath or declaration is defective because:
It does not identify the citizenship of each inventor.

The citizenship of the fourth inventor is unclear in the declaration of 11/25/03.

5. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Art Unit: 2651

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

6. Claim 1 is provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 14 of copending Application No. 10/620,542. Although the conflicting claims are not identical, they are not patentably distinct from each other because it is the obvious method of the apparatus of Serial No. 10/620,542.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

7. Claim 4 is provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 14 of copending Application No. 10/620,542 in view of US 2002/0192506, hereinafter "Coffey". Claim 14 shows the claimed invention except for a laser heater. However, such techniques are well known. For example, see element 206 of Coffey. The motivation for combining references can be found at the abstract of Coffey. It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify claim 14, as taught by Coffey, to increase recording density.

This is a provisional obviousness-type double patenting rejection.
